

FULL CONTROL AT YOUR FINGERTIPS

When it comes to application and terminal management, the PAXSTORE is a proven choice for the most advanced terminal management system. For the first time in the world, estate managers can not only manage their terminal profiles for all Android-based and traditional devices, they can inject new PIN and P2PE keys, send merchants real time notifications, locate their devices, and replicate screens for technical assistance.

Can your terminal management system do all that?
