Q25

Retail PIN Pad

The Q25 is a PCI PTS 5.x-certified consumer-facing and activated PIN Pad that supports all forms of electronic payment, including magnetic stripe cards, EMV smart cards, NFC contactless cards & phones, and QR codes. The sleek and ergonomic design of the Q25 lends itself to being mounted on a stand/countertop or handed over to the consumer. It is equipped with a color LCD display, an integrated PIN-entry keypad, a hardened glass display, and an optional privacy shield. The Q25 is designed to be connected to and driven by a merchant-facing PAX payment terminal, such as the A80, or a Point-of-Sale (POS) terminal. These connected devices manage the payment transactions, communicating with the appropriate financial institution or processing gateway in full integration mode.
