1 INTRODUCTION

PAXSTORE is a secure Cloud-Based (SaaS) platform for application management, terminal remote management, and value-added service business. Each organization could host own marketplace on a separated domain with data isolation, transmission encryption, unified identity authentication, access control, and remote configuration.

PAXSTORE is a secure Cloud-Based (SaaS) platform for application management, terminal remote management, and value-added service business. Each organization could host own marketplace on a separated domain with data isolation, transmission encryption, unified identity authentication, access control, and remote configuration.

1.1 SCOPE

The document lists out the FAQs only for the Marketplace Administrator Center. It will help the user easy to use the system.

2 BASIC CONFIGURATIONS

This section describes the FAQs about some configuration that should be configured before any daily business operations.

2.1 How to setup and configure a manufacturer?

- 1) Click on the [Model Management] -> [Manufacturer List]
- 2) Click the [CREATE MANUFACTURER] button to create new Manufacturer '*PAX Technology*'.

2.2 How to configure a model?

- 1) Click on the [Model Management] -> [Manufacturer List]
- 2) Click on the [CREATE MODEL] button to create new model-'A920'.

2.3 How to create a Reseller and point a user as admin of the reseller?

- 1) Click on the [Management] -> [Terminal Management].
- 2) Choose the root reseller, and click on the Reseller Detail tab. And then the [+SUB-RESELLER] link will help create a new sub-reseller.
- 3) Input 'reseller1@pax.com' as login name, 'New PAX Reseller' as reseller name, and some other properties to create sub-reseller.
- 4) The user 'reseller1@pax.com' will receive mail to activate the account by click the specific link from the mail.

- 5) After account activated. The 'reseller1@pax.com' become an admin of the reseller. And can access [Management], [Monitors]by default.

2.4 How to assign access for a new user to monitor the reseller's terminal?

- 1) Click on the [Role Management] menu item.
- 2) Click the [NEW ROLE] button. Then choose the specific functions (Terminal Map & Dashboard) to create a new role -'Monitor role'.
- 3) Assign user(reseller2@pax.com) to the role by clicking the Add User icon. After created, the user will receive an email to activate the account.
- 4) After account activated, user(reseller2@pax.com) can access Terminal Map & Dashboard functions.

3 APPROVAL FOR DEVELOPER/APPLICATION?

3.1 How to verify and approve newly registered developers?

The developer or partner (developer1@pax.com) needs to register as a Developer to publish an application to the system. After developer requests submitted, the admin needs to review and approve it.

- 1) Click on the [Developer Approval] to pending developers (include developer1@pax.com) will be displayed.
- 2) Click on the developer to view the details and do approval on the detail page.

3.2 How to verify and approve the newly submitted application?

Approved Developer can submit the application. Admin wants to review and approve the applications.

- 3) Click on the [App Management], the pending apps will be displayed.
- 4) Click on the pending app and do a necessary review on the package and make the final decision to approve the application.

4 MAINTAIN TERMINALS

4.1 How to add POS Client to the system to be managed?

- 1) Click on the [Management] -> [Terminal Management].
- 2) Click [CREATE] button to add new terminal (. e.g. SN:0820087293).
- 3) After created, view the detail of the terminal, and then click the [Activate] button to activate the terminal.
- 4) Please startup the PAXSTORE app of the terminal to Online the terminal.
- 5) Once the terminal connected to the system successful, the hardware status of the terminal will become Online.
- 6) Alternative, you can import a batch of the terminals by clicking the [IMPORT BUTTON]. A template can be downloaded, which can help to guide you to prepare terminals info for batch import.

4.2 How to manage terminals by batch?

- 1) Click on the [Management] -> [Group Management].
- 2) Create a new group for the terminals.

- 5) Approval/Admin review and approve the new version app client app to online it.
- 6) PAXSTORE app on the terminal will check the updates of the new version and do the necessary upgrade.

8 Merchant Setup and Configuration

This section covers topics related to merchant setup and configuration.

8.1 Is it possible to disable or enable seasonal merchant accounts and terminals?

The PAXSTORE currently does not have an option to support enabling or disabling seasonal merchants and their terminals. If a merchant needs to disable or enable transaction processing, then the merchant should contact their credit card processor regarding the account.

Even if the merchant or terminal account was deleted from the PAXSTORE it will not prevent the terminal from performing transactions with their processor.
